## 8. EXPOSURE CONTROLS / PERSONAL PROTECTION

**National Exposure Standards:** Not Applicable

**Biological Limit Values:** Not Applicable

None required when handling small quantities.

**OTHERWISE**

Engineering controls are used to remove a hazard or place a barrier between the worker and the hazard. Well-designed engineering controls can be highly effective in protecting workers and will typically be independent of worker interactions to provide this high level of protection.

**Engineering Controls:**

The basic types of engineering controls are:  
Process controls which involve changing the way a job activity or process is done to reduce the risk.  
enclosure and/ or isolation of emission source which keeps a selected hazard "physically" away from the worker and ventilation that strategically "adds" and "removes" air in the work environment.  
For Eye – no special equipment for minor exposure i.e. when handling small quantities  
**OTHERWISE:** Safety glasses with side shields

**Personal Protective Equipment:**

For Hands/ Feet – no special equipment needed when handling small quantities.  
**OTHERWISE:** Wear general protective gloves  
  
OTHER – no special equipment needed when handling small quantities.  
**OTHERWISE:** Overalls, Barrier cream, Eyewash unit.
